

TMC IML Turnkey System 模內貼標設備

TMC the Perfect Partner for IML Application

TMC Technology Corp. specializes in the application of plastic injection to plastic injection industrial automation.

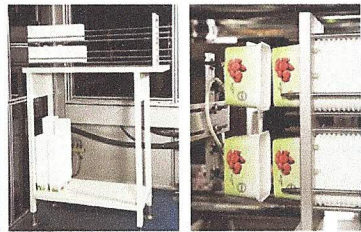

The IML automatic system is much more colorful than before and is highly value-added. In addition, IML, which applies 3-axis side-entry servo robot and go with label feeding machine, brings high speed, efficiency and low loss.

慶僑工業模內貼標系統是以"慶僑TMC射出成形機"搭配專用"側取式三軸伺服機械手"，做各種射出成形自動化的應用。

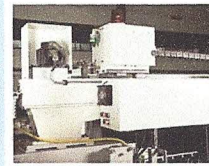

從射出、貼標、取出成品至堆疊排列等，令客戶所生產的產品能達到：色彩繽紛、精緻美觀、附加價值提高，且達成高速、高效率、低不良率的需求。

We fulfill customers' requirements. A complete set includes injection molding machine, mold, IML robot, label feeding machine and label can be supplied from TMC. You can choose a complete set or which you need for IML application. We develop an in-mold labeling (IML) system running simple lids to complicated thin-walled containers.

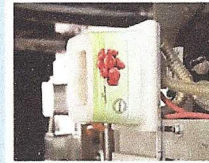

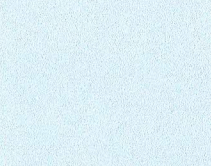

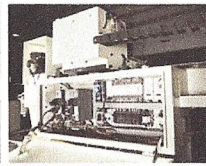

我們針對客戶生產需求，規劃設計射出成形模內貼標自動化設備，從射出機-模具-側取式三軸伺服機械手-供紙機-IML標籤紙等選擇性或完整配套規劃設計輸出，我們提供您簡易蓋子貼標到複雜容器貼標的自動化系統。

1 Product-stacking Equipment

2 3-axis Servo Robot

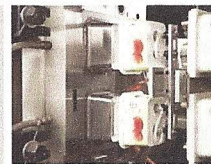

3 Label Feeder

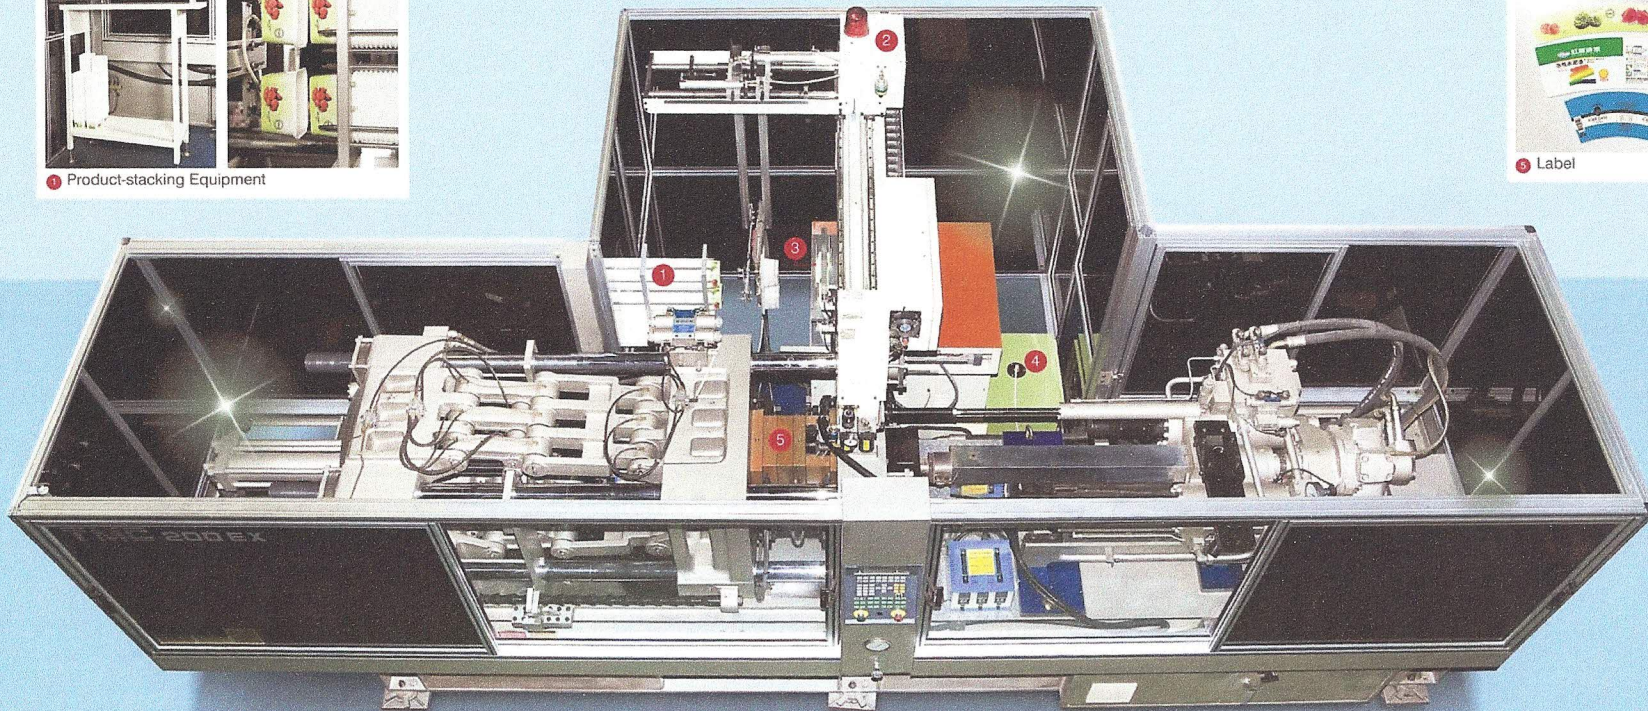

4 Electrostatic Machine

5 Label

6 Hot-runner Mold

Best

TMC had been continuously researching and improving on the associated technical aspects, resulting in the high speed in-mold labeling system. TMC quality and reliability are guaranteed. Supporting this technology is a highly experienced staff, making TMC the perfect partner for IML application.

慶僑TMC在模內貼標技術上持續研究及精進，大幅縮短成形周期，保證設備的高品質及穩定性，TMC是您模內貼標應用的最完美合作供應廠商。
